Professional Summary

Senior Full Stack Developer with nearly five years of software development experience. Works on payment platforms at Geopagos, with experience in React microfrontends, backend services and transaction security. Builds complete web products using TypeScript, Next.js, Node.js and databases. Final-year Information Systems Engineering student at UTN Buenos Aires, with professional working proficiency in English. Collaborative and empathetic, with a positive attitude and a commitment to continuous learning and professional growth.

Professional Experience

Geopagos | Senior Full Stack Developer

February 2022 - Present | Current title

- Contribute to the design and development of Geopagos' Acquirer in a Box platform.
- Developed the internal backoffice and React microfrontends using TypeScript, and backend services using C#, .NET and Python.
- Developed payment security services supporting MPoC certification requirements.
- Contributed to authorization and access control across platform services.

UTN Buenos Aires | Teaching Assistant

February 2023 - Present

- Review and assess practical assignments for the second-year Programming Paradigms course.

Wolfsohn Secondary School | Application Developer

August 2020 - January 2021

- Developed an application connecting parents with school administration using React, Expo, JavaScript, HTML and CSS.

Technical Skills

Languages: C#, TypeScript, JavaScript, Python, Java.

Backend: .NET, Node.js, Express.

Frontend & Mobile: React, Next.js, React Native, Expo.

Data & Identity: PostgreSQL, MySQL, MongoDB; Amazon Cognito, Keycloak, Supabase, SpiceDB.

Cloud & Delivery: AWS, Docker, Terraform; GitHub Actions, GitLab CI.

Testing & Code Quality: Jest, Cypress, xUnit, SonarQube; unit, integration and end-to-end testing.

Domain Knowledge

Payments: Payment acquiring and transaction lifecycle, settlement and reconciliation.

Security & Identity: Authentication, authorization and payment security; familiarity with PCI DSS and MPoC requirements.

System Design: Event-driven systems, reliable API integrations and multitenant applications.

Languages

Spanish: Native | English: Professional working proficiency | Hebrew: Basic

Selected Projects

Chilta | Sole Developer

Personal project | Started approximately 2025 | chilta.com.ar

- Designed and developed the complete live shopping system independently, including the frontend, backend and integrations.
- Implemented live streams, chat, events, direct sales and auctions, with a product catalog and Tiendanube integration.

Technologies: Next.js, React, TypeScript, Node.js, Express, Supabase, LiveKit, Socket.IO, Redis, BullMQ.

GiraFutbolera | Full Stack Developer

Two-developer team | Four-month development cycle | girafutbolera.com.ar

- Co-developed the public website and the complete supporting business system.
- Built an administration interface to manage teams, matches, tours and business-specific configuration, using Supabase for authentication and the database.

Technologies: Next.js, Supabase.

Radix | Full Stack Developer

Personal project and university capstone | April 2026 - Present

- Built the frontend, a substantial part of the backend and the application design for a platform that evaluates commercial locations.
- Worked on location scoring, map-based exploration, alerts, reports and simulations; contributed design ideas for the data infrastructure.

Technologies: Next.js, React, TypeScript, Node.js, Python, Supabase, Redis, BullMQ.

faceshape-react | Library Creator

Open-source project | github.com/ketzelitvak/faceshape-react

- Created a React library for customizable SVG avatars as an experiment using AI exclusively to generate the implementation.
- Directed iterative development of composable shapes, animated facial expressions, documentation and an interactive demo.

Technologies: React, TypeScript, SVG, AI coding tools.

Ketze Tools | Developer Utilities

January 2024 - Present | ketze.com.ar | Next.js

- Develop and maintain a Next.js website offering tools for developers, with an evolving collection of utilities.

Education

Universidad Tecnológica Nacional Buenos Aires

Information Systems Engineering | 2021 - Present | Expected graduation: December 2026

Wolfsohn Secondary School

International Baccalaureate Diploma | Completed

Leadership and Additional Training

Youth Leader and Nonformal Educator (Madrich)

Círculo Social Hebreo Argentino | January 2021 - December 2025

- Planned and facilitated educational activities for children, promoting teamwork and values through play.

Leadership School

O.H.A Macabi | January 2017 - December 2019

Sports Mentor Course

O.H.A Macabi | July 2020 - November 2020
